# ABILITY TO PREVENT RECEIPT SUBMISSION FOR OVER-RECEIVED PO'S

Users will be prevented from completing a receipt if it is associated with an over-received purchase order. An error message will display and the user will not have the ability to submit the receipt.

The screenshot displays the 'Receipt Lines' interface. A red arrow points to the 'Previous Receipts' column for line 1, which has a value of 205120. A yellow tooltip box is overlaid on the 'Quantity' column for line 1, containing the following error message:

- Over receive condition
- The quantity for this line does not match the value of associated documents and is outside the allowed tolerance.

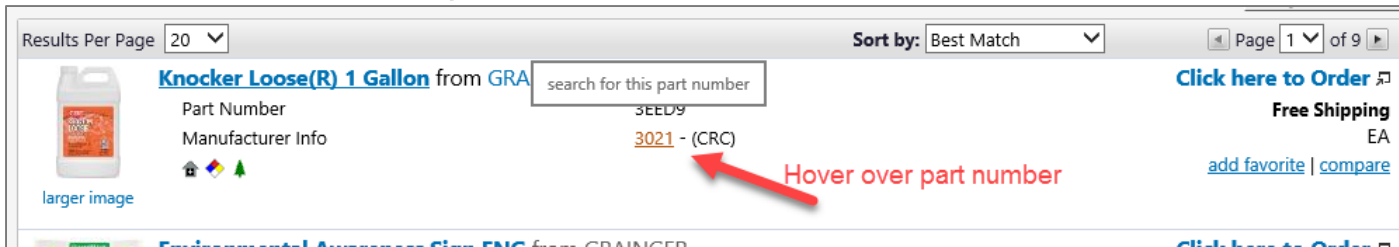

The table below summarizes the data visible in the screenshot:

PO No.	PO Line No.	Product Name	Catalog No.	Qty/UOM ordered	Previous Receipts	Quantity	Add to Inventory	Line Status	Actions	
E000260413	1	Office Chairs		2	205120	1		Received	Remove Line Receive & Return	<input type="checkbox"/>

At the bottom of the interface, there are buttons for 'Delete', 'Add PO', 'Save Updates', and 'Complete'. The 'For Selected Lines:' dropdown is set to 'Remove Selected Items' with a 'Go' button next to it.

# PRODUCT SEARCH HYPERLINK

Hovering over a manufacturer part number in search results reveals a help box explaining the action available.

By clicking on the hyperlink, users will see results for all products with that manufacturer part number. The user may select to go back to previous results.
